## The LSU Department of Medicine Weekly Communication

Dr. Juzar Ali (Pulmonary/Critical Care) published a qualitative analysis of the impact on patients with refractory Mycobacterium avium complex lung disease (MAC-LD) of strategies used to manage adverse events (AEs) associated with amikacin liposome inhalation suspension. The paper was published in Pulmonary Therapy.

Dr. Paul Harch (Emergency Medicine) recently had a poster presented at an international Pediatrics Intensivist conference in collaboration with colleagues at Loma Linda. They presented results of hyperbaric treatment for a child after a non-fatal drowning.

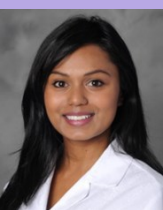

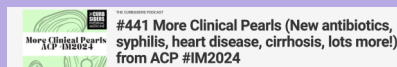

Dr. Mehnaz Rahman (Cardiology) was recently selected to participate in the **Women as One 2024 CLIMB Prevention Program**. This program offers programs and events crafted specifically for women in cardiology that are uniquely designed to address the barriers women face in their working environments, providing clinical skills training, professional development, and safety training.

Congratulations, Dr. Rahman!

In Infectious Diseases, Dr. Victoria Burke and Dr. Fred Lopez's Infectious Disease Update presentation at the American College of Physicians Annual Session in Boston was highlighted in a recent "The Curbsiders" podcast. Way to go!

Dr. Mehnaz Rahman (Cardiology) recently became a member of the Louisiana Pregnancy Associated Mortality Review (LA-PAMR) Committee. The committee received over 55 applicants! Reviewers noted of Dr. Rahman "You presented a very competitive application that conveyed not only your subject matter expertise, but also your passion for improving maternal outcomes in Louisiana through multidisciplinary case review, timely reports, and provision of actionable recommendations to understand and prevent pregnancy-associated deaths." Great job!
