The LSU Department of Medicine Weekly Communication

Dr. Monica Klaybor (Cardiology Fellow) recently published in the Journal of Medical Education and Curricular Development titled “Development and Assessment of Simulation-Based Point-of-Care Ultrasound Curriculum in Undergraduate Medical Education.” The article assesses whether high-fidelity ultrasound simulation during Internal Medicine clerkship would improve POCUS confident and knowledge among medical students.

Congratulations, Dr. Klaybor!

Development and Assessment of Simulation-Based Point-of-Care Ultrasound Curriculum in Undergraduate Medical Education

Dr. Gala True (Community and Population Medicine) and the Armory Project were recently highlighted in the Wall Street Journal. “The gun shop storage movement was an evolution of an informal practice among some gun owners who held on to guns for friends in crisis. In Louisiana, the Armory Project, an initiative of the Department of Veterans Affairs, sought to formalize it by recruiting dealers to help.” You can view the article here:

How Gun Shops Became the New Face of Suicide Prevention
