

Dr. Santosh Lamichhane
Research Fellow

Education

LSU Health New Orleans, post doctorate fellow, present

Wonkwang University, South Korea. Masters in pharmacology, 2016, Ph.D, pharmacy, 2022

Pokhara University, Pokhara, Nepal, undergraduate

Dr. Lamichhane's work is critical to understanding gene function and designing gene-specific target therapy. He is focusing on oncogenes and their roles in breast cancer and colon cancer metastasis. Dr. Lamichhane's primary objective is to develop gene therapy for cancer detection, treatment, and prognosis.

Dr. Lamichhane's research interests include molecular and cancer biology, behavioral neuroscience, neurodegenerative diseases and genetics.
