

Is there an unmet need
in healthcare that you
want to solve?

SLING HEALTH

Sign up here

What is SLING?

SLING is a national organization that brings together teams of students (medical, engineering, business, etc.) to tackle problems in medicine and healthcare.

At the LSU branch of SLING, we create interdisciplinary teams of students, provide mentorship and consulting to teams, and supply teams with the resources they need to bring their ideas to fruition (whether it's a proof of concept or prototype).

No prior experience with design or engineering is necessary. You may bring in your own idea to form a team or join a team that sounds interesting to you!

Why Join?

- Solve unmet needs in healthcare using design principles
- Develop skills in team working, presentation, design, and prototyping
- Connect with a national network of medical students, physicians, and entrepreneurs
- Present your idea at the 2025 National SLING Health Demo Day.

LSU's two teams presenting their design ideas at the 2024 National SLING Health Demo Day in Ann Arbor, Michigan
