

SIPS

Students Interested in Pathology Specialties

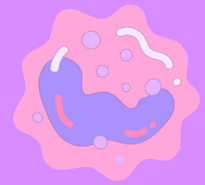

About Us

SIPS promotes exposure to and interest in the field of pathology and offers valuable networking opportunities with faculty and residents.

What is Pathology?

Pathologists use laboratory techniques like microscopy, molecular testing, and immunohistochemistry to analyze patient samples such as tissues, organs, and bodily fluids in order to diagnose disease! Some Pathologists even perform autopsies.

Past Events

- UMC Lab Tour
- Pathology Faculty Panels

No Dues!
